

THE SCIENTIST

CONTENIDO

VOLUMEN 27 No. 12 DECEMBER 2013

FEATURES

- 32 **Taking Shape.**
The causes of a cell's three-dimensional structure remain a fundamental mystery of cell biology.
Wallace F. Marshall.
- 38 **One Man's Trash...**
Scientists who dared to waste their time looking at the midbody, a remnant of cell division, have catapulted the organelle to new prominence.
Kerry Grens.
- 44 **Top 10 innovations 2013.**
The Scientist's annual competition uncovered a bonanza of interesting technologies that made their way onto the market and into labs this year.
The Scientist Staff.

DEPARTMENTS

- 13 **From the Editorial**
Organelle Architecture.
There's beauty in a cell's marriage of structure and function.
Mary Beth Aberlin.
- 17 **Notebook**
Waiting in the Wings; Metropolome; Little Drummer Bugs; Disorder No More.
- 26 **Critics at Large.**
The Great Divide.
A two-way bridge between science and policy is desperately needed
Didier Schmitt.
- 28 **Critics at Large.**
An Open invitation.
On creating communal, equitable discourse to broaden participation in genetics research.
Aaron Buseh.
- 31 **Modus Operandi.**
Proto-Organelles for Synthetic Cells.

Researchers construct lipid-encapsulated compartments within synthetic cells.

Ruth Williams.

52 **The Literature.**
Turbulence-driven formation of microscale plankton patches; ER sheets connected by spiral membrane tubules; seasonal variation in fish hearing.

54 **Profile.**
Biology's Coefficient.
Joel Cohen uses the tools of mathematics to deconstruct questions of life.
Megan Scudellari.

59 **Scientist to Watch.**
Karmella Haydes.
Kerry Grens.

60 **Lab Tools.**
Out, Damned Mycoplasma!
Pointers for keeping your cell cultures free of mycoplasma contamination.
Kelly Rae Chi.

63 **TS Webinar Series Summary.**
PCR: Past, Present, & Future.
Celebrating 30 years of PCR: the technique's invention, quantitative real-time PCR, and digital PCR.
Jeffrey M. Perkel.

67 **Careers.**
Weathering the Storm.
How to prepare your lab for natural disasters and cope with unavoidable consequences.
Jef Akst.

71 **Reading Frames.**
Standing Up for Sex.
Humans evolved the ability to walk on two legs because it allowed them to more accurately size up prospective mates. Or did they?
Henry Gee.

72 **Capsule Reviews.**
Bob Grant.

84 **Foundations.**
Harrowing Egg Hunt, 1911.
Chris Palmer.
