

SCIENTRIFIC

CONTENIDO

No. 82, NOVEMBER-DECEMBER 2012

FEACTURES

- 5 The footprints left on the Moon by Neil Armstrong's boots in 1969 are still there today.
- 8 Computers store information as a code made of two digits – one and zero.
- 12 Australia's lyre bird gets its name from a musical instrument.
- 14 The Indonesian mimic octopus pretends to be different animals to trick predators.
- 18 Bacteria that can cause food poisoning in humans are perfectly at home in a chicken's gut.
- 22 Vampire bats can sense prey with heat-sensing nerves in their noses.

Hands-on activities

- 26 Mimic Memory.

COVER IMAGE

Wearing hand – me down clothes isn't so bad when you consider the hermit crab. Get some tips on keeping these shell-shopping critters on page 5, then flick over to page 6 to see how you hunt for empty shells yourself.
