

JOURNAL OF CHEMICAL EDUCATION

CONTENIDO

VOLUMEN 87 No. 5 MAY 2010

COVER

The three-dimensional representation of the Lincoln Memorial in Washington, DC shown on the cover was created in a classroom using a simple system consisting of a data projector shining light on a solution of a photoinitiated polymer. The product of this process pictured here has just over 50 cross-sectional layers, yet fits on a penny (a U.S. coin ~2 cm in diameter). Although not directly visible in this picture, the statue of Abraham Lincoln sitting in a chair is present behind the center column. This Example highlights the complexity of objects that students can design and create with the inexpensive process described in the article, Three-Dimensional Printing Using a Photograph was taken by Chas Conway.

CHEMICAL EDUCATION TODAY

Editorial

- ▲459 Innovate To Educate.
Norbert J. Pienta.

Especially for High School Teachers.

- ▲460 Quilt as Desired.
Erica K. Jacobsen and Laura E. Slocum.

- ▲462 The VSEPR Challenge: A Student's Perspective.

Reports from Other Journals.

- ▲464 Research Advances: Paper Batteries, Phototriggered Microcapsules, and Oil-Free Plastic Production.
Angela G. King.

Instrumentation Topics for the Teaching Laboratory.

- 467 Analytical Pyrolysis — Chromatography: something Old, Something New.
Nathan W. Bower and Conor J. K. Blanchet.*

Chemical Education across Cultural and National Borders.

- ▲470 Offering English-Mediated Chemistry Classes in South Korea: A Note in This Nationwide Experiment.

Jae-Seung Lee.

Commentary.

▲472 Reflections Catalyzed by an Assault on a Favorite Principle.
Emeric Schultz.

▲474 May News & Announcements.

Letters

▲476 Balancing Redox Equations
Roger L. DeKock and Benjamin M. Brandsen.*

Letters

▲476 Response to Letter from DeKock and Brandsen about Balancing Redox Equations.
William B. Jensen.

Letters

▲477 Addition to Letter from DeKock and Brandsen about Balancing Redox Equations.
W. R. Smith.

Letters

▲477 Editor's Response to Letter from DeKock and Brandsen about Balancing Redox Equations.
