

NATIONAL GEOGRAPHIC

CONTENIDO

VOLUME 219 No. 4, APRIL 2011

- 34 **Genius of the Inca.**
How did they build an empire? Archaeologists find new clues.
Heather Pringle.
Photographs by Robert Clark.
- 59 The ghost town of Machu Picchu was “found” 100 years ago.
Heather Pringle.
- 62 **A Jewel in Two Crowns.**
Crimea was once Russia’s paradise. Now it belongs to Ukraine.
Cathy Newman.
Photographs by Gerd Ludwing.
- 82 **Volcano Next Door.**
To save an African city, scientists drop into a red-hot lava lake.
Michael Finkei.
Photographs by Carsten Peter.
- 100 **The Acid Sea.**
Sea stars shrink. Sea urchins are stunted. We are the cause.
Elizabeth Kolbert.
Photographs by David Littschwager.
- 122 **Miracle Above Manhattan.**
New Yorkers can float over busy streets in an innovative park.
Paul Goldberger.
Photographs by Diane Cook and Len Jenshel.
- 138 **Indomitable Snow Frogs.**
When Alpine Lakes start to defrost, their frogs go courting.
Mei White.
Photographs by Cyril Rouso.

DEPARTMENTS

- 4 **Editor’s Note.**

6 **National Geographic in TV.**

10 **Letters.**

12 **Your Shot.**

14 **Vision of Earth.**

POPULATION

Marriage Across Color Lines

Once illegal in many states, Interracial marriages are on the rise in the U. S.

GEOGRAPHY

State Rock Stars.

California was among the first to name —and the first to nearly disown— its state rock.

HISTORY

Polar Dogs and Ponies.

An aeronautical chart of New Zealand-to-Antarctica route honors four-legged explores.

CULTURE

Zeroing in on Corruption.

Indian officials who stick out a hand for extra cash are chastened with a zero-rupee note.

FOSSILS

Prehistoric Big Birds.

An ancient flier's 17-foot wingspan offers clues to how supersize birds flew.

THE BIG IDEA

30 **Perennial Grains.**

Annual grains feed the world, but they create perennial problems.

146 **Inside Geographic.**

Flashback.

ON THE COVER

With 3-D data, experts helped shape this image of Machu Picchu, “lost city” of the Inca. The conical roof sits on the Temple of the Sun
