

NATURE

CONTENIDO

VOLUME 467 No.7319, OCTOBER 2010

THIS WEEK

EDITORIALS

- 1005 **Industry Policy.**
The innovation game.
The European Union needs a new approach to nurturing innovation.
- 1005 **Agriculture.**
Not quite assured.
Current phosphate fertilizer use remains unsustainable.
- 1006 **Space Research.**
Space hitch-hiker.
Suborbital tourist flights present new opportunities for researchers.

WORLD VIEW

- 1007 Spending review leaves research in the lurch.
David King.
Britain faces stiff challenges from government cuts.

RESEARCH HIGHLIGHTS

- 1008 **Selections from the Scientific Literature.**
Keep fish on the menu / Quiescent cells stay active / Explosive detection / Mammoth's leftovers / Long RNAs boots gene expression.

SEVEN DAYS

- 1010 The news in Brief.
FDA remains cautious on obesity drug approvals / Rare earth element trade dispute intensifies / GlaxoSmithKline in the dock over Avandia marketing policy.

CAREERS

- 1114 **Regions.**
Science city chic.
Berlin's long-term plans.
- 1143 **Turning Point.**

Greg Graffin on combining evolutionary biology with his punk band.

- 1143 Briefs.
European's grant system / Biodiversity centre for Germany / Women in the workforce.

NATUREJOBS NEWS FEATURES

Spotlight on Berlin.

NEWS IN FOCUS

- 1013 Astronomy.
Expectations grow as Hartley 2 cometary fly-by approaches.
- 1015 Global Health.
Claim that malaria deaths in India under-reported sparks controversy.
- 1017 Research Funding.
UK core science funding is spared in government's cuts package.
- 1018 Earth Science.
Seismologists warn that Haiti still faces earthquake risk.
- 1020 Publishing.
Anonymous group targets misconduct allegations at researchers.
- 1021 Environment.
Campaign against mountaintop mining poised for victory in Appalachians.

FEATURES

- 1026 Genomics.
Genomes by the thousand.
Tracking the rising tide of sequenced human genomes.
- 1028 Astronomy.
Rising costs.
NASA's expensive James Webb Space Telescope could suck funds from other worthy projects.

TECHNOLOGY

- 1135 Genomics.
The search for association.
Despite an expanding list of human genetic variations, understanding their contribution to disease is still a challenge.

COMMENT

- 1031 Stem-Cell Research.

Long shadow of the stem-cell rulings.
Jonathan D Moreno; John M Nolan, Emad U Samad, Suy Anne R Martins & Stephen G Brozak; Patrick L Taylor.

AUTUMN BOOKS

- 1034 Cosmology.
 Space-time turn around.
 Lee Smolin.
- 1036 Neuroscience.
 Learning to see.
 Steve Silberman.
- 1036 New in Paperback.
- 1037 Botany.
 Hitchers, outcasts and wasteland beauties.
 Sandra Knapp.
- 1039 History.
 A polymath rediscovered.
 George Rousseau.
- 1040 Ecology.
 Conservation thriller earns its stripes.
 Geoff Marsh.
- 1042 Quantum Physics.
 Tripping the light fantastic.
 Geoff Pryde.
- 1043 Mathematics.
 Deception by numbers.
 Jascha Hoffman.
- 1044 Forensics.
 Crime- scene science in the dock.
 Laura Spinney.

CORRESPONDENCE

- 1047 In defence of the Marine Stewardship Council / Pakistan's brain drain /
 Pensioning off research animals.

OBITUARY

- 1048 Georges Charpak (1924-2010)
 Ioannis Giomataris.

FUTURES

- 1146 The greatest science-fiction story ever written.
Eric James Stone.

RESEARCH

NEW ONLINE

- 1049 Papers publishing this week at nature.com.

NEWS & VIEWS

- 1050 Genomics.
In search of rare human variants.
Welcome to the third phase of human genomics.
Rasmus Nielsen.
See Article p. 1061.
- 1051 Drug Development.
Longer-lived proteins.
A hindrance to the efficacy of protein drugs has been tackled.
Jeffrey A Hubbell.
- 1052 Biogeochemistry.
Phosphorus and the gust of fresh air.
Phosphorus connects the end of global glacial conditions with a rise in oxygen.
Gabriel M Pilippelli.
See Letter p. 1088
- 1053 Cancer.
Genomic evolution of metastasis.
Fold-back inversions of chromosomes are an early clue to pancreatic cancer.
E Georg Luebeck.
See Article p. 1109 & 1114
- 1055 Stem Cells.
The Intestinal-crypt casino.
Intestinal stem can divide symmetrically.
Mchael P Verzi & Ramesh A Shivdasani.
- 1057 Astrophysics.
Weighing in on neutron stars.
The most massive neutron star yet detected provides core information.
M Coleman Miller.
See Article p. 1181
- 1074 Plant Sciences.
Pore result.

The anion channel that controls stomatal opening.
See Article p. 1058 & 1074

PERSPECTIVE

- 1058 Structural Biology.
A peep through anion channels.
A Structural study illuminates the action of pores in plant leaves.
Sébastien Thomine & H el ene Barbier-Brygoo.
See Article p. 1074

ARTICLES

- 1061 Genomics.
A map of human genome variation from population-scale sequencing.
The 1000 Genomes Project Consortium.
See N&V p. 1050
- 1074 Plant Sciences.
Homologues structure of the SLEAC1 anion channel for closing stomata in leaves.
Y-h Chen et al.
See N&V p. 1058

LETTERS

- 1081 Astronomy.
A two-solar-mass neutron star measured using Shapiro delay.
P B Demorest, T Pennucci, S M Ransom, M S E Roberts & J W T Hessels.
See N&V p. 1057
- 1084 Physics.
Detecting excitation and magnetization of individual dopants in a semiconductor.
A A Khajetoorians et al.
- 1088 Geology.
The evolution of the marine phosphate reservoir.
N J Planavsky et al.
See N&V p. 1052
- 1091 Geophysics.
Deformation of the lower-most mantle from seismic anisotropy.
A Nowacki, J Wookey & J-M Kendall.
- 1095 Anthropology.
Late middle Eocene epoch of Libya yields earliest known radiation of African anthropoids.
J-J Jaeger et al.

- 1099 Genetics.
Fine-scale recombination rate differences between sexes, populations and individuals.
A Kong et al.
- 1095 Anthropology.
Out of Asia.
Higher primate fossils from Libya point to early diversification in Asia.
- 1104 Neuroscience.
On-line, voluntary control of human temporal lobe neurons.
M Cerf et al.
- 1109 Cancer.
The patterns and dynamics of genomic instability in metastatic pancreatic cancer.
P J Campbell et al.
See N&V p. 1053
- 1114 Cancer.
Distant metastasis occurs late during the genetic evolution of pancreatic cancer.
S Yashida et al.
See N&V p. 1053
- 1118 Structural Biology.
Structural basis of semaphoring-plexin signalling.
B J C Janssen et al.
- 1123 Structural Biology.
Structural basis for semaphoring signaling through the plexin receptor.
T Nogi et al.
- 1128 Developmental Biology.
Maternal mRNA deadenylation and decay by the piRNA pathway in the early *Drosophila* embryo.
C Rouget et al.

ON THE COVER

Lift-off.

The pilot phase of The 1000 Genomes Project has tested three different strategies for genome-wide sequencing.

Pages 1050 & 1061.
