## CONTENIDO

VOLUME 477 No.7362, SEPTEMBER 1 2011

### **THIS WEEK**

#### **EDITORIALS**

- 5 **Russia.**  
**The permanent revolution.**  
State control is hindering Russia's scientific renaissance.
- 5 **Research.**  
**Reality check.**  
There's no easy route to success in scientific research.

#### **WORLD VIEW**

- 7 **The Arab Spring offers hope but no quick fix.**  
*Rana Dajani.*  
It will take time for science to find its feet in the Arab world.

#### **RESEARCH HIGHLIGHTS**

- 8 **Selections from the scientific literature.**  
Green nanotubes / A new route to trifluoromethyl compounds / Gene therapy success / Ebb and flow in yeast genome / Pioneer anomaly explained.

#### **SEVEN DAYS**

- 10 **The news in brief.**  
Quake and hurricane hit eastern US / Turkey shakes up research / Denmark backs industrial development in the Arctic / Funds run out for US ocean drilling.

#### **CAREERS**

- 121 Florida  
**Second thoughts.**  
Florida's efforts to establish a presence in the bioscience industry.
- 123 Column.  
**The magical world of data sharing.**  
*Andrew Peterman.*  
A scientist in Disneyland.

123 Career Briefs.

## NEWS IN FOCUS

13 Energy.  
Incoming prime minister steps into energy vacuum in Japan.

14 Genomics.  
Project to sequence 1,001 *Arabidopsis* genomes hits the halfway mark.

15 Nuclear Physics.  
Tough economic climate smooths way for construction of isotope facility.

16 Lunar Science.  
NASA mission set to map Moon's gravity.

17 Collaboration.  
Russian bureaucracy delays joint research project in Siberia.

18 Policy.  
European science strives to speak with one voice.

## FEATURES

20 Research.  
**The 24/7 lab.**  
Should science be allowed take over your life?

23 Neuroscience.  
**Taking at free will.**  
Philosophers and neuroscientists square up over whether or not free will exists.

## COMMENT

27 Research.  
**Logging off.**  
Julie Overbaugh says a healthy work life balance will enhance research.

## BOOKS & ARTS

29 Ecology.  
**Redefining nature.**  
*Shahid Naeem.*

30 Particle Physics.  
**Inside the collider.**  
*Joseph Silk.*

- 31 Books in Brief.
- 32 Q & A.  
**Comic creator.**  
Jim Ottaviani's latest graphic novel tackles Richard Feynman

## CORRESPONDENCE

- 33 Logging continues in Indonesian forests / Plea to save Istanbul lab /  
Monitoring the environment for drugs / Diplomas that can travel.
- 34 **Baruj Benacerraf (1920-2011)**  
*Ronald N Germain & William E Paul.*

## FUTURES

- 126 **A sentence to life.**  
*Igor Teper.*

## RESEARCH

### NEW ONLINE

- 35 Papers publishing this week at nature.com.

### NEWS & VIEWS

- 36 HIV.  
**How to escape treatment.**  
Possible reasons for HIV replication during treatment.  
*Steven G Deeks.*  
[See Letter p.95](#)
- 37 Astrophysics.  
**A hint of normality at last?**  
Discovery of an iron-poor star with a 'normal' ratio of carbon to iron.  
*John E Norris.*  
[See Letter p. 67](#)
- 39 Ecology.  
**Nitrogen from the deep.**  
Sedimentary bedrock can act as a nitrogen source for ecosystems.  
*Edward A G Schuur.*  
[See Letter p. 78](#)
- 40 Cancer.  
**Tumour-fighting virus homes in.**  
Delivery and replication of an oncolytic virus in tumours.  
*Evanthia Galanis.*  
[See Letter p. 99](#)

41 Ageing.  
**Blood ties.**  
Age-related regulation of neurogenesis by a chemokine.  
*Richard M Rancohoff.*  
See Letter p. 90

42 Materials Science.  
**Dry solution to a sticky problem.**  
A material that sticks to skin without glue.  
*Jeffrey M Karp & Robert Langer.*

Cancer.  
**Going viral.**  
Infecting tumours with an ‘oncolytic’ virus as therapy.  
Pages 40 & 99.

#### ON THE COVER

**Stone ages.**  
The age of the earliest known Acheulian stone tools, considered the signature technology of *Homo erectus*, has been put back 350,000 years compared to previous estimates, at 1.76 million years old. On the cover, a large crude handaxe (KS4-203) shaped by hard hammer percussion from a flat phonolite pebble. Pages 82.

#### REVIEW

45 Engineering.  
**Synthesis, assembly and applications of semiconductor nanomembranes.**  
*J A Rogers, M G Lagally & R G Nuzzo.*

#### ARTICLES

54 Human Genetics.  
Human metabolic individuality in biomedical and pharmaceutical research.  
*K Suhre et al.*

61 Biochemistry.  
The mechanism of membrane-associated steps in tail-anchored protein insertion.  
*M Mariappan et al.*

#### LETTERS

67 Astronomy.  
An extremely primitive star in the Galactic halo.  
*E Caffau et al.*  
See N&V p. 37

- 70 Planetary Science.  
Chronological evidence that the Moon is either young or did not have a global magma ocean.  
*L E Borg, J N Connelly, M Boyet & R W Carlson.*
- 73 Physics.  
Real-time quantum feedback prepares and stabilizes photon number states.  
*C Sayrin et al.*
- 78 Earth Science.  
Increased forest ecosystem carbon and nitrogen storage from nitrogen rich bedrock.  
*S L Morford, B Z Houlton & R A Dahlgren.*  
See N&V p 39
- 82 Palaeoanthropology.  
An earlier origin for the Acheulian.  
*C J Lepre et al.*
- 86 Ecology.  
Transient dynamics of an altered large marine ecosystem.  
*K T Frank, B Petrie, J A D Fisher & W C Leggett.*
- 90 Neurodegeneration.  
The ageing systemic milieu negatively regulates neurogenesis and cognitive function.  
*S A Villeda et al.*  
See N&V p 41
- 95 Virology.  
Cell-to-cell spread of HIV permits ongoing replication despite antiretroviral therapy.  
*A Sigal et al.*  
See N&V p 36
- 99 Cancer.  
Intravenous delivery of a multi-mechanistic cancer-targeted oncolytic poxvirus in humans.  
*C J Breitbach et al.*  
See N&V p 40
- 103 Microbiology.  
Modulation of RAd GTPase function by a protein phosphocholine transferase.  
*S Mukherjee et al.*
- 107 Neurodegeneration.  
A-Synuclein occurs physiologically as a helically folded tetramer that resists aggregation.  
*T Bartels, J G Choi & D J Selkoe.*

- 111 Protein Science.  
Solution structure of a minor and transiently formed state of a T4 lysozyme mutant.  
*G Bouvignies et al.*
- 115 Molecular Biology.  
Protection of repetitive DNA borders from self-induced meiotic instability.  
*G Vader et al.*
- 120 Addendum.  
Post-traumatic stress disorder is associated with PACAP and the PAC1 receptor.  
*K J Ressler et al.*
