

NATURE

CONTENIDO

VOLUME 478 No.7367, OCTOBER 6 2011

THIS WEEK

EDITORIALS

- 5 **Stem Cells.**
High-interest clones.
The fraud of Woo Suk Hwang casts a lingering shadow over a developing field.
- 5 **European Science.**
The games begin.
Europe-wide funding programme must address the needs of newer EU members.
- 6 **Science Fiction.**
Back to the Futures.
Nature celebrates the 400th instalment of science fiction in Futures.

WORLD VIEW

- 7 **The voice of science: let's agree to disagree.**
Daniel Sarewitz.
It's often the minority report — not the consensus view — that hits the spot.

RESEARCH HIGHLIGHTS

- 8 **Selections from the scientific literature.**
Cyclin E's role in memory / Java men / Make things with maglev / Atlantic Ocean warming / Mouse model for autism / startling goldfish.

SEVEN DAYS

- 10 **The news in brief.**
UK invests in grapheme but puts SPICE on ice / China launches test module for space station / Jackson lab sets sights on Connecticut / Amazon dam project halted for second time / Farewell to the Tevatron.

CAREERS

- 143 Education.
Inspiration for informatics.

Bioinformatics is a broadly applicable approach — but it pays to specialize too.

145

Column.

The human touch.

Lydia Soraya Murray.

There's an important social dimension to science.

Naturejobs advertising feature.

Spotlight on genetics.

NEWS IN FOCUS

13

Nobel Prize.

Award for work on immune system marred by death of winner.

14

Nobel Prize.

Accelerating Universe lands physics prize.

15

Mental Health.

Europe uncovers massive cost of brain disorders.

16

Policy.

Framework programme's successor promises simpler grant process.

17

Ethics.

Should research subjects be made aware of problems in their DNA?

19

Gene Sequencing.

Personal genomics proves a major draw.

20

Metrics.

Journal ranking under fire.

FEATURES

26

Publishing.

The trouble with retractions.

Can science publishers really cope with withdrawn research?

22

Genomics.

First base.

The challenges of using whole-genome sequences in the clinic.

TECHNOLOGY.

137

Microscopy.

Bright light, better labels.

New microscopes are bringing high-resolution images of ever-smaller targets and now biologists need the fluorescent labels to match.

COMMENT

- 29 Environment.
A broken geochemical cycle.
James Elser & Elena Bennett.
Recycling is the answer to the problems of phosphorus pollution and supply.

BOOKS & ARTS

- 32 History.
Scaling up.
Andrew Robinson.
- 33 Books in Brief.
- 34 Palaeoanthropology.
Heads-up.
The discovery of a lost paper by Raymond Dart has implications for Hobbit watchers, says Henry Gee.
- 35 Q & A.
Speculative realist.
Human inventiveness can achieve great things but, says Margaret Atwood, we are more likely to get it wrong.

CORRESPONDENCE

- 36 Keep drugs out the environment / The gender gap / The 'human cloning' debate / The science of energy / Threatened forests / Restoring trust.

FUTURES

- 148 **Here be monsters.**
Stephanie Zvan.

RESEARCH

NEW ONLINE

- 39 Papers publishing this week at nature.com.

NEWS & VIEWS

- 40 Stem Cells.
Forum: Triple genomes go far.
Human stem cells generated by oocyte-mediated reprogramming.
George Q Daley & Jan Helge Solbakk.
See Letter p.70

- 41 Extrasolar Planets.
Homing in on another Earth.
Identification of closest analogue of Earth yet.
Jacob Bean.
- 42 Molecular Medicine.
Defence against oxidative damage.
Role of an immune-system protein in age-related macular degeneration.
Fernando Cruz-Guilloty & Victor L Perez.
See Letter p. 76
- 44 Palaeoanthropology.
Malapa and the genus *Homo*.
An analysis of hominin fossil remains.
Fred sppor.
- 45 Statistical Physics.
Self-aware particles.
Observing the self-interactions of a colloid in solution.
Ulrich F Keyser.
See Letter p. 85
- 46 Muscular Dystrophy.
A hidden ancestral legacy trumped.
Abnormal mRNA splicing underlying Fukuyama muscular dystrophy.
Masayuki Nakamori & Charles Thornton.
See Letter p. 127
- 47 Quantum Mechanics.
The gentle cooling touch of light.
Bringing a nanomechanical resonator to its lowest energy state.
Florian Marquardt.
See Letter p. 89
- PERSPECTIVE**
- 49 Earth Science.
Persistence of soil organic matter as an ecosystem property.
M W I Schmidt et al.
- ARTICLES**
- 57 Human Genetics.
Deep sequencing reveals 50 novel genes for recessive cognitive disorders.
H Najmabadi et al.
- 64 Cancer Genomics.
Frequent pathway mutations of splicing machinery on myelodysplasia.
K Yoshida et al.

- 70 Stem Cells.
Human oocytes reprogram somatic cells to a pluripotent state.
S Noggle et al.
See N&V p. 40

ON THE COVER

Thin chance.

Genetic screening reveals that low body weight is often associated with duplication of a short region on chromosome 16 that, when deleted, is associated with obesity. Severe obesity and 'underweight' may have mirror aetiologies, perhaps via contrasting effects on energy balance. [Page 97](#).

- 76 Medicine.
Complement factor H binds malondialdehyde epitopes and protects from oxidative stress.
D Weismann et al.
See N&V p. 42

LETTERS

- 82 Astronomy.
Detectable radio flares following gravitational waves from mergers of binary neutron stars.
E Nakar & T Piran.
- 85 Physics.
Resonances arising from hydrodynamic memory in Brownian motion.
T Franosch, M Grimm, M Belushkin, F M Mor, G Foffi, L Forró & S Jeney.
See N&V p. 45
- 89 Physics.
Laser cooling of a nanomechanical oscillator into its quantum ground state.
J Chan et al.
See N&V p. 47
- 93 Earth Science.
A carbon isotope challenge to the snowball Earth.
P Sansjofre, M Ader, R I F Trindade, M Elie, J Lyons, P Cartigny & A C R Nogueira.
- 97 Genetics.
Mirror extreme BMI phenotypes associated with gene dosage at the chromosome 16p11.2 locus.
S Jacquemont et al.
- 103 Human Genetics.
Genetic variants in novel pathways influence blood pressure and cardiovascular disease risk.
The International Consortium for Blood Pressure Genome-Wide Association

Studies.

- 110 Physiology.
Dynamics of human adipose lipid turnover in health and metabolic disease.
P Arner et al.
- 114 Cardiovascular Biology.
Endonuclease G is a novel determinant of cardiac hypertrophy and mitochondrial function.
C McDermott-Roe et al.
- 119 Plant Sciences.
Control of flowering and storage organ formation in potato by FLOWERING LOCUS T.
C Navarro et al.
- 123 Neuroscience.
Peripheral SMN restoration is essential for long-term rescue of a severe spinal muscular atrophy mouse model.
Y Hue, K Sahashi, F Rigo, G Hung, G Horev, C F Benett & A Krainer.
- 127 Molecular Biology.
Pathogenic exon-trapping by SVA retrotransposon and rescue in Fukuyama muscular dystrophy.
M Taniguchi-Ikeda et al.
- 132 Molecular Biology.
ATP-induced helicase slippage reveals highly coordinated subunits.
B Sun, D S Johnson, G Patel, B Y Smith, M Pandey, S S Patel & M D Wang.
- 136 Corrigendum.
Detection of prokaryotic mRNA signifies microbial viability and promotes immunity.
L E Sander et al.
