

SCIENCE & CHILDREN

CONTENIDO

VOLUME 49 No. 2 OCTOBER 2011

The symbol ● identifies content related to this issue's focus:

MOVE IT! MOTION AND FORCES

GRADES 5- 6

● 32

May the Force Be With You!

Students discover the net forces all around them with a portable force indicator

Timothy Young and Mark Guy.

GRADES K - 2

● 38

Let It Roll.

Exploring motion with young children.

Kathy Cabe Trundle and Mandy McCormick Smith.

GRADES K - 6

42

The Art and Science of Notebooks.

An interdisciplinary approach to teaching students to record accurately.

Keri Porter, Craig Yokoi, and Bertina Yee.

GRADES 4 - 6

● 47

Inquiry Science and Active Reading.

Pairing a force and motion lesson with a “blackout” reading activity.

Cody Sandifer.

GRADES K - 6

52

Becoming Science “Experi-mentors”

Tenets of quality professional development and how they can reinvent early science learning experiences.

Shelly Lynn Counsell.

GRADES K - 2

57

The NOS Challenge.

Thirty days of nature of science instruction for elementary students.

Cassie Quigley, Gayle Buck, and Valarie Akerson.

Teaching Through Trade Books

A Balancing Act.

- 26 **Early Years.**
Objects in Motion.

- 28 **Formative Assessment Probes.**
Puches and Pulls.

- 62 **Science 101.**
Why don't all rolling objects reach the bottom of an incline at the same time?

- 66 **Science Shorts.**
How Many Ways Are There To Move?

- 69 **Recognizing Excellence.**
From Macro to Micro to Nano.

- 74 **NSTA Recommends.**

IN EVERY ISSUE

- 8 **Editor's Note**
- 10 **Call for Papers**
- 84 **Advertisers Index**

In this issue, it's all about movement! Students' misconceptions go out the window as they reconceptualize their understanding of motion and forces.
