

SCIENCE & CHILDREN

CONTENIDO

VOLUME 49 No. 5 JANUARY 2012

The symbol ● identifies content related to this issue's focus:

EARTH, MOON, SUN

- 31 GRADES 4 - 6
Shadow Play.
Linking shadows to learning about seasons.
Kathy Cabe, Trundle and Margilee P. Hilson.
- 36 GRADES 4 - 6
Landing Safely on Mars.
An integrated unit highlights engineering practices.
Eileen Merritt and Elizabeth Shiffett.
- 41 GRADES 4 - 6
Sinking Your Teeth Into Tooth Decay.
A multidisciplinary inquiry activity for fifth-grade students.
Jody H. Stone.
- 46 GRADES K - 3
Is a Mealworm Really a Worm?
Introducing science notebooks to novice writers through the IMSCI model.
Kimberly Lott and Sylvia Read.
- 52 GRADES K - 12
Collegiality and Better Science Teaching.
What can happen when teachers participate in a professional learning community!
Brenda Weiser.
- 56 GRADES K - 12
Reach for the Stars!
NASA and NSTA teaching resources can accentuate your Earth and space science lessons.
Albert Byers, Steve Marks, and Paul Tingler.

TEACHER RESOURCES

- 8 **Core Ideas of engineering and Technology.**
Cary Sneider.
- 17 **In the News**

● 22 **Teaching Through Trade Books**
Gravity and Weight.

● 26 **Early Years.**
Seeing the Moon.

● 28 **Formative Assessment Probes.**
The Daytime Moon.

60 **Methods and Strategies.**
It's Child's Play.

● 66 **Science 101.**
What causes the tides?

● 72 **NSTA Recommends.**

IN EVERY ISSUE

● 6 **Editor's Note**

8 **Call for Papers**

76 **Advertisers Index**

Misconceptions abound concerning the relationship between the Earth, Sun, and Moon. In this issue, we examine ways to teach these difficult concepts accurately.
