

SCIENCE NEWS

CONTENIDO

VOLUME 178 No. 5, AUGUST 2010

IN THE NEWS

- 5 **Story One.**
▪ Cash register receipts deposit worrisome chemical in fingers.
- 7 **Molecules.**
▪ Online gamers beat computer at protein-folding task.

▪ Sniffing out hidden graves.
- 8 **Genes & Cells.**
▪ Genes support sponges' spot at base of animal family tree.

▪ Cellular suicide plays dual role in cancer growth.
- 9 **Body & Brain.**
▪ Violent dreams presage brain's decline.

▪ Termite hors d'oeuvres beef up gut bacteria.
- 10 **Life**
▪ Marine census documents oceanic diversity.

▪ Original marsupial hailed from South America.

▪ Contraceptives may make female lemurs less attractive.

▪ Duck genitals grow longer with competition.
- 12 **Atom & Cosmos.**
▪ Moon may be parched, after all.

▪ Dark matter's favorite galaxy.
- 13 **Earth**
▪ Solar flare warning signals.

▪ Brazilian deforestation diminishes.

▪ Chinchilla droppings could help gauge desert rains.

FEATURES

- 14 **Scour Power.**
COVER STORY: Scientists take to the air and peer underwater to see how hurricanes have sculpted coastlines.
Sid Perkins.
- 18 **Cancer's Little Helpers.**
When tiny hairpin molecules known as microRNAs go awry, cells can turn cancerous.
Tina Herman Saey.
- 22 **Mining for Missing Matter.**
Physicists build detectors in underground lairs to hunt for the dark stuff that makes up most of the universe's mass.
Ron Cowen.

DEPARTAMENTS

- 2 **From the Editor**
- 4 **Notebook**
- 28 **Bookshelf**
- 29 **Feedback**
- 32 **Comment**
Chemistry Nobel laureate Harold Kroto issues a call to improve science education and promote sustainability.

COVER

Breakwaters on Louisiana's Raccoon Island Have failed to stop erosion of the island's shores, which are in the line of fire from seasonal storms.
Robert Caputo/Getty
