▪ Morality with time stamps.

▪ Miscarriage woes long-lasting.
- 14** **Body & Brain.**
▪ Antibiotics quash flu-fighting protein in mice.

▪ U.S. Diabetes Belt mapped.
- 15** **Genes & Cells.**
▪ Neurons grow into tubes.

- Lost chunks of DNA may have shaped human evolution.

16

Atom & Cosmos.

- Precise Hubble constant dashes dark energy alternative.
- Wish list for planet missions.

FEATURES

18

Backup Bees.

With the overworked honeybee facing increased threats, scientists are turning to other insect species to step up and pollinate valuable food crops.

Susan Milius.

22

Star Cents.

A NASA culture that encourages researchers to lowball cost estimates has led to a \$1.4 billion overrun of the James Web Space Telescope's budget.

Ron Cowen.

28

Big Fishing Yields Small Fish.

Improved harvesting technologies and the effects of climate change are decreasing the size of the fish still left in the seas.

Rachel Ehrenberg.
