CONTENIDO

VOLUME 179 No. 11, MAY 2011

IN THE NEWS

- 5 Story One.**
▪ NASA mission confirms that Earth drags spacetime.
- 8 Atom & Cosmos.**
▪ Pluto may have grown a tail.

▪ Thicker atmosphere once made for a wetter Mars.
- 9 Body & Brain.**
▪ Armadillos suspected of spreading leprosy.

▪ Awake but not alert: Brain cells doze in tired rats.
- 10 Life.**
▪ Calibrating the allure of peacock tails, by the eyespot.

▪ Robot mimics caterpillar roll.

▪ Female dogs outsmart males when it comes to surprises.

▪ Fire ants stick together to form watertight rafts.
- 12 Earth.**
▪ Lithospheric drip may have buoyed the Colorado Plateau.

▪ Losing Arctic shores.
- 14 Genes & Cells.**
▪ Gut microbe communities come in three flavors.

▪ Fruit flies on meth.
- 15 Environment.**
▪ Prenatal pesticide exposure may lower IQ.

▪ Ozone hole's rainy reach.
- 16 Humans.**
▪ Poor multitaskers miss gorilla-suited intruder.

- Right-handed Neandertals.

FEATURES

18 **Going Under.**
General anesthesia makes patients blissfully unaware of scalpel-wielding surgeons, but exactly how it acts on the brain remains largely unknown.
Susan Gaidos.

22 **Dawn of the Dinosaurs.**
COVER STORY: Studies of early dino fossils suggest that precursors of *Tyrannosaurus* and *Brachiosaurus* were chicken—sized critters whose planetary rule was not guaranteed.
Alexandra Witze.

28 **Into Orbit.**
The MESSENGER spacecraft is designed to uncover new details about Mercury's core, volcanism and magnetic field.
Ron Cowen.

DEPARTMENTS

2 **From the Editor**

4 **Notebook**

30 **Bookshelf**

31 **Feedback**

32 **From the Archive**
In the 1930s, solving nine simultaneous equations required a mechanical calculator the size of a car.

COVER

In the late Triassic, dinosaurs (early theropod shown eating a critter) lived alongside bigger and scarier creatures.
