

# ***THE SCIENCE TEACHER***

## **CONTENIDO**

**VOLUME 78 No. 2 FEBRUARY 2011**

### **FEACTURES ON THE THEME**

- 28      **One Fish, Two Fish, Redfish, You Fish!**  
A biological and mathematical exploration of human impacts on a recreational fishery.  
*Katherine White, Maryellen Timmons, and Paul Medders.*
- 34      **Modeling Natural Selection.**  
Using model-based inquiry and wikis to learn about evolution.  
*Christopher A. Bogiages and Christine Lotter.*
- 42      **Antigenic Shift and Drift.**  
Modeling the evolution of the influenza virus.  
*Meena Balgopal and Cindi Bondy.*

### **ALSO IN THIS ISSUE**

- 48      **Teaching Forward.**  
Using case-based instruction to foster critical thinking.  
*Anthony Derriso.*
- 53      **A Tale of Four Electrons.**  
Using creative writing to learn about chemical bonding.  
*Paul Burgmayer.*

### **DEPARTAMENTS**

- 6      **Editor's Corner**  
Model Biology.
- 8      **Safer Science**  
Equipment Safety: UL Rating and More.
- 10      **Science 2.0**  
"Flipping" Your Classroom.
- 12      **The Green Room**  
Student Sustainability Conferences.
- 14      **The New Teacher's Toolbox.**  
Making the Most of "Lost Days".

16	<b>Headline Science</b> Wet-Dog Physics • Ice-Age Reptile Extinctions • Living Lung Imaging • Massive Star Formation • Protein-Protein Interfaces • Unlocking Compulsion.
41	<b>Call for Papers.</b>
47	<b>Author Guidelines.</b>
58	<b>Idea Bank</b> Electronic BessSpace.
64	<b>Career of the Month.</b> An Interview With Yoga Therapist J. J. Gormley-Etchells.
68	<b>NSTA Recommends</b>
76	<b>Index of Advertisers</b>

## **COVER**

Models are at the core of the scientific enterprise. They help us make predictions, understand complex systems, generate new ideas, and visualize both the very large and the very small. This issue of The Science Teacher provides ideas for using models in your classroom.
