

THE SCIENCE TEACHER

CONTENIDO

VOLUME 79 No. 3 MARCH 2012

FEACTURES ON THE THEME

- 42 **Rock On!**
Using gravel to promote critical thinking in the classroom.
Renee Clary and James Wandersee.
- 55 **What's Missing?**
Finding the hidden environmental science story in everyday news.
Yael Wyner.
- 60 **Exploring the Unknown.**
Fostering critical thinking in Earth and space science.
Amy Pallant, Sarah Pryputniewicz, and Hee-Sun Lee.
- 66 **What Were They Thinking?**
Instructional strategies that encourage critical thinking.
Rachael Adams Jones.
- 72 **Are You Certain?**
Teaching error analysis and other experimental skills in the physics
classroom.
David Bonner.

ALSO IN THIS ISSUE

- 38 **Engaging: Students in Scientific Practices: What Does Constructing
and Revising Models Look Like in the Science Classroom?**
Understanding *A Framework for K-12 Science Education*.
Joseph Krajcin and Joi Merritt.
- 47 **Outstanding Science Trade Books for Students K-12.**
Books published in 2011.
*Selected by the National Science Teachers Association/Children's Book
Council Review Panel.*

DEPARTAMENTS

- 6 **Editor's Corner**
Thinking Critically.
- 8 **Safer Science**
Goodbye MSDS, Hello SDS!

- 10 **Science 2.0**
Creative, Inspiring, and Jaw-Dropping Videos.
- 12 **The Green Room**
Earth Day 2012.
- 14 **The New Teacher’s Toolbox.**
Lighting the Fire of Enthusiasm.
- 16 **Headline Science**
Salamanders Adapt to Toxic Ponds • Stormy Space Weather • Cyclone Damages to Rise • Cheap electricity From Green Plants • Disease-Causing Plasmids • Software for Aerospace Design • Pythons Devour Everglades Mammals • Little Ice Age.
- 78 **Idea Bank**
13 Tips for Writing in the Science Classroom.
- 80 **Career of the Month.**
An Interview With Energy Engineer Bill Reinert.
- 82 **NSTA Recommends**
- 100 **Index of Advertisers**

COVER

If students don’t develop the habit of critical, analytical thinking, they will never achieve meaningful understanding. A head full of scientific facts and ideas is not enough: The ability to think critically gives these ideas meaning and allows them to flourish and grow. This issue of *The Science Teacher* suggests ways to incorporate critical thinking in your classroom — through gravel investigations, error analysis, and unsolved mysteries.
