

# SCIENTIFIC AMERICAN

## CONTENIDO

VOLUME 303 No. 6 DECEMBER 2010

### FEATURES

#### INNOVATION

42

##### **World Changing Ideas.**

A special report on thoughts, trends and technologies that have the power to change our lives.

#### PHYSICS

54

##### **A Geometric Theory of Everything.**

Deep down, the particles and forces of the universe are a manifestation of exquisite geometry.

*A. Garrett Lisi and James Owen Weatherall.*

#### PALEONTOLOGY

62

##### **Blood from Stone.**

Mounting evidence from dinosaur bones (such as “Big Mike’s,” shown above) Shows that, contrary to common belief, soft tissue can survive in fossils for millions of years.

*Mary H. Schweitzer.*

#### BIOLOGY

70

##### **Life Unseen.**

The biological world reveals microscopic landscapes of surprising beauty.

*Davide Castelvecchi.*

#### HEALTH

76

##### **Hallucinogens as Medicine.**

In a matter of hours, mind-altering substances may induce the profound psychological realignments that can take decades to achieve on a therapist’s couch.

*Roland R. Griffiths and Charles S. Grob.*

#### INFORMATION SCIENCE

80

##### **Long Live the Web.**

In an exclusive essay, the Web’s inventor argues that protecting the Web is critical not merely to the digital revolution but to our continued prosperity—and even our liberty.

*Tim Berners-Lee.*

#### LIFE SCIENCE

86

##### **Jane of the Jungle.**

Primatologist Jane Goodall shares insights from her 50 years among the

chimpanzees of Gombe.  
*Kate Wong.*

## SPACE EXPLORATION

- 88 **Jump-Starting the Orbital Economy.**  
For the first time in five decades, NASA will soon be out of the astronaut-launching business. The only way to save manned spaceflight may be to outsource it to private companies.  
*David H. Freedman.*

## ROBOTICS

- 94 **Cyborg Beetles.**  
Tiny flying robots that are part machine and part insect may one day save lives in wars and disasters.  
*Michel M. Miharbiz and Hirotaka Sato.*

## DEPARTMENTS

- 10 **From the Editor**
- 12 **Letters**
- 16 **Science Agenda.**  
The laws of physics are the least of NASA's challenges.  
*The Editors.*
- 18 **Forum.**  
Truth, witnesses and brain scans.  
*Hank Greely.*
- 20 **Advances.**  
Exoplanetary life. Malaria genetics. Beer foam math.  
Proving Hawking right. Wireless body armor.  
Science books and toys for kids, Jellyfish propulsion.
- 36 **The Science of Health.**  
Do exercising and quitting smoking delay the onset of dementia?  
*Christine Gorman.*
- 40 **TechnoFiles.**  
Speech-recognition software has quietly grown tendrils into every corner of our lives.  
*David Pogue.*
- 100 **Recommended.**  
Eye-catching books for holiday gift-giving.  
*Kate Wong.*
- 102 **Skeptic.**

The difference between true and false conspiracy theories.  
*Michael Shermer.*

104 **Anti Gravity.**  
A mind is a terrible thing to your waist.  
*Steve Mirsky.*

106 **50, 100 & 150 Years Ago.**

108 **Graphics Science.**  
Smart controls can rebuild collapsed fisheries.  
*Mark Fischetti.*

### **On the Cover**

This year's edition of World Changing Ideas explores the leading ways that technology and innovation can create a healthier. Cleaner, smarter world, from biologically inspired algorithms to vegetarian robots to a cheap nanotech-based water filter.
