

# ***NEW SCIENTIST***

## **CONTENIDO**

**VOLUME 214 No. 2863, MAY, 5 2012**

### **CONTENTS**

#### **NEWS**

- 6 Living moon.**  
Renewed hope for life on Titan.

#### **ON THE COVER**

- 30 One brain, two minds.**  
The surprising impact of speaking another language.

- 6 Living moon.**  
Hopes for life on Titan.

- 38 Invisible death stars.**  
Mystery supernovae.

- 26 Wild life.**  
Tales from the world's most violent rainforest.

- 34 Drugs with bite.**  
New cures from old enemies.

#### **Instant expert.**

The low-down on 2D wonder stuff, graphene.

#### **FEATURES**

- 34 Drugs with bite.**  
New cures from old enemies.

#### **NEWS**

#### **4 UPFRONT**

Australian megadrought ends. Particle excitement at the LHC. Meteorite gold rush.

#### **6 THIS WEEK**

Strange fat keeps skin waterproof. Wrinkled doughnut solves mystery. Literature under the lens. A font for visualizing numbers.

#### **8 SPECIAL REPORT**

Big solar's big problem.

14

## **IN BRIEF**

Pigeon GPS caught in action. Mars valley forged in fire. Oldest blood cells found.

## **TECHNOLOGY**

17

AI looks for autism. Bacterial hard drives. Flickr's weather data. Robot Mad Men. More frames make better movies? The email truth.

## **APERTURE**

22

Underground coal fires burn for 100 years.

## **OPINION**

24

### **Twisted truth.**

Are killer tornadoes warnings from a warming world, asks Harold Brooks.

25

### **One minute with... Brooke Magnanti.**

Former call-girl blogger on our sex myths.

26

### **Fieldwork frontier.**

Ecologist Vojtech Novotny copes with warring tribes.

28

## **LETTERS**

Global biobanks. Pain's purpose.

## **FEATURES**

30

### **One brain, two minds.**

(see above left)

34

### **Drugs with bite.**

(see left).

38

### **Invisible death stars.**

Mystery of the missing supernovae.

## **INSTANT EXPERT**

### **Graphene.**

Low-down on the 2D wonder material by its Nobel-prizewinning pioneer.

## **CULTURELAB**

42

### **Right from wrong.**

Our ancestors hold the key to understanding how we become moral.

43

### **Scientific arts.**

Da Vinci was one of history's great anatomists. PLUS: Mental time travel.

- 44      **Know thyself.**  
Digging into US DNA is a surprisingly rich exercise. PLUS: Who am I?

## **REGULARS**

- 3      **Editorial.**  
The dominance of English as the global language is a mixed blessing.

- 28      **Enigma**

- 48      **Feedback**  
Explosive health.

- 49      **The Last Word**  
Die another day.

- 46      **Jobs & Careers.**
