CONTENIDO

VOLUME 32 No. 8, OCTOBER 2011

THE WORLD IS FULL OF PROBLEMS. SCIENCE HAS SOLUTIONS.

- 33 **The cure for Everything.**
Bug Bites, Nuclear Fallout, Traffic, Murder, Data Overload, Air Travel, and more.
- 42 **The end of Aids.**
Jill Neimark.
- 51 **There's a Shot for that.**
Jessica Snyder Sachs.
- 58 **Biohackers.**
Delthia Ricks.
- 3 **Mail.**
- 4 **Editor's Note.**
- 8 **Data.**
A seismic threat to the U.S. heartland, how soil and trees sequester CO₂, the deepest underground animal ever found, engineering a superstrong One World Trade Center, a lizard-like rescue bot, the future of broadband, snail survivors, how the Forest Service saved baseball, and more.
- 19 **Hot Science.**
The wonders of the open seas, a science film festival, and the best new books, movies, and DVD's.
- 22 **The Brain.**
How did humans acquire language? Fossil genes are helping scientists piece together a convincing answer.
Carl Zimmer.
- 26 **Impatient Futurist.**
Super clothing that renders you invulnerable to attack and accident without busting your budget.

David H. Freedman.

28 Vital Signs.

A toddler has a life-threatening mass encasing his trachea, and it's not what his doctors expected.

Roy Smytle.

30 Out There.

Are there universes beyond our own, or is the idea just idle academic musing? A renowned cosmologist offers some surprising answers in the debut of our new column.

Sean Carroll.

80 20 Things You Didn't Know About Fire.

LeeAundra Keany.
