

THE SCIENTIST

CONTENIDO

VOLUMEN 24 No. 9, SEPTEMBER 2010

FEATURES

- 34 **Touching RNA.**
COVER STORY
RNA can bind and sense the shapes of other molecules by feeling them with its backbone— and not just its bases. ANINA MIRIE PYLE describes what gives RNA molecules this remarkable versatility.
- 40 **Why Trust a Reporter?**
It's rare to find a scientist who can speak eloquently about his or her work in a way that excites others, including journalists and their audience. But it doesn't have to be that way— EDYTA ZEILINSKA presents what science writers are looking for and why answering their calls can benefit you and your science.
- 47 **Web Gems.**
Introducing the winners of the first annual Labbies, our prizes for the best Web-based multimedia by labs.

DEPARTMENTS

- 13 **Editorial**
What's Your Elevator Pitch?
It's imperative to communicate your science, but not as PR machines.
Sarah Greene.
- 21 **Notebook**
TB or not TB?; Cell+ phone; Guerilla science; Top 7 from F1000: One on One: Metal therapy.
- 30 **Thought Experiment.**
Redesigning Scientific Reputation.
Rewards and incentives for online collaboration can make better science.
Bo Adler, Ian Pye, and Luca de Alfaro.
- 32 **Critic at Large.**
Crowdsourcing Drug Discovery.
Fact: The current system of finding new drugs is not working. Here's what to do about it.
Stephen Friend.
- 52 **Profile**

Some Nerve.

Rodolfo Llinás's fearless approach to neurophysiology has redefined our thinking about individual neurons and how they create movement and consciousness.

Karen Hopkin.

57

The Literature

Hidden ribozymes in eukaryotic genomes; transcription and translation errors are surprisingly common; light sheds light on Rac's role; a piston proton pump. Scientist to Watch:

Monica Bettercourt-Dias.

63

Lab Tools

Outsourcing your RNA.

How to get the most molecular bang for your buck when you your RNA away.

Jeffrey M. Perkel.

69

BioBusiness

Botanical Biopharming.

Green-thumbed biotechs say they can use plants to make drugs faster, cheaper, and better than top pharmaceutical companies.

Megan Scudellari.

72

Careers

Skipping Your Postdocs.

How to whip your postdocs into researchers you would want to collaborate with.

Jennifer Welsh.

84

Foundations

The Discovery of Penicillin, circa 1928.

Cristina Luiggi.

IN EVERY ISSUE

11

Contributors

14

Mail

Eyelashes up close; Scientists vs. engineers: Is the synthetic cell about life?
Opinion: Erase science's blacklist.

18

Eavesdroppings

Science quotations of the month.

66

The Guide.

77

Recruitment.
