

THE SCIENTIST

CONTENIDO

VOLUMEN 24 No. 10, OCTOBER 2010

FEATURES

- 38 **The Gates of Immortality.**
COVER STORY
Yeast cell division is yielding clues about how offspring are protected from the ravages of aging. YVES BARRAL explores how specific molecules create a barrier that keeps genetic mistakes accrued in the parent from passing to the young.
- 44 **Recess.**
Fish, reptiles, and even some invertebrates like to play. But when is it play and not something else? And why do animals do it? JEF AKST goes in search of answers.
- 52 **The One True Path?**
Ongoing research is linking insulin signaling to several complex illnesses. JENNIFER WELSH presents some of the evidence that is expanding knowledge of the hormone's role in physiology.

DEPARTMENTS

- 13 **Editorial**
Social Experiments
Can blogs and new media make science work better?
Richard P. Grant.
- 21 **Notebook**
Congo calling; Spite's roots; Scientist as subject; top 7 from F1000; One on One: Shrinking birds.
- 33 **Thought Experiment.**
America's Stem Cell Mess.
Other countries have laws that provide researchers with legal and moral clarity.
Josephine Johnston.
- 36 **Critic at Large.**
One of the Good Guys.
Being someone who shares cell lines and reagents can be more satisfying than being a famous PI at a major lab.
H. Steven Wiley.

- 60 **Profile**
Take Two Antibodies...
Martin Raff has used antibodies to examine membranes, immune cells, and shine a light on nervous system function. But he doesn't believe in waiting for the full story before publishing.
Karen Hopkin.
- 65 **The Literature**
New tools for HIV vaccine design; noncoding repeats of DNA make organisms more robust; nanoparticles fight autoimmune disease; it's like GFP, but smaller and safer. Scientist to Watch:
Ekaterina Heldwein.
- 71 **Lab Tools**
Harnessing the cloud.
Free platforms for powering your genomics and proteomics data analysis using processing power rented in the sky.
Amy Maxmen.
- 79 **BioBusiness**
Biotech on the Bayou.
Efforts to develop Louisiana's biotech industry are giving New Orleans scientists—and the local economy—a much needed boost.
Jennifer Welsh.
- 83 **Careers**
You Aren't Blogging Yet!?!?
Maintaining a blog can be a boon to your career, increasing your profile in the scientific community, connecting you to collaborators and helping you land new grants or jobs.
Bob Grant.
- 92 **Foundations**
James's Fever Powder, circa 1746.
Jennifer Welsh.
- IN EVERY ISSUE**
- 11 **Contributors**
- 14 **Mail**
Peer review: Rejected?
- 18 **Eavesdroppings**
Science quotations of the month.
- 74 **The Guide.**
- 87 **Recruitment.**
