

THE SCIENTIST

CONTENIDO

VOLUMEN 24 No. 12, DECEMBER 2010

FEATURES

- 34 **The Allergy Gene.**
COVER STORY
An unruly gene that took a Herculean effort to sequence is providing new clues about allergies. W. H. IRWIN McLEAN writes about his search for skin-disease gene mutations that set the stage for both eczema and asthma.
- 40 **Equations That Spell Disaster.**
Researchers are pinpointing the factors that combine to produce complex diseases.
Cristina Luiggi.
- 47 **Top 10 Innovations of 2010.**
The ten most innovative life science tools to debut this year, selected by our panel of experts.
THE SCIENTIST STAFF

DEPARTMENTS

- 13 **Editorial**
Innovations ‘R Us
Networks move scientific discovery forward at the speed of light.
Sarah Greene.
- 21 **Notebook**
72-Hour Ribs; Feeling Sleepy?; Infectious Curiosity; One on One: Still Ticking; Top 7 from F1000.
- 30 **Thought Experiment.**
Evolving the Scientific Method.
Technology is changing the way we conduct science.
Kevin Kelly.
- 32 **Critic at Large.**
Evidence: A Seductive but Slippery Concept.
Medical guidelines based on so-called scientific evidence are not a panacea.
Richard Smith.
- 54 **Profile**
Methods Man.
A fever fueled Stanley Fields’ invention of the two-hybrid system for

detecting protein interactions. Happily, his passion for devising new ways to study biology's messy problems still burns hot.

Karen Hopkin.

57

The Literature

How pathogens establish persistent infections; why does a marine sponge have genes for muscles?; starches, not proteins, pinch a chloroplast during division; a method for characterizing cellular structures that are hard to isolate; Scientist to Watch:

Elias Spiliotis.

63

Lab Tools

Playing Up the Single Life.

Single-cell applications to help you explore the tiniest great unknown.

Amy Maxmen.

69

BioBusiness

Fish'n' Chips.

Anew genotyping technology detours from medicine to find a surprising (and profitable) niche in the salmon and cattle industries.

Megan Scudellari.

72

Careers

Off the Beaten Path.

Bench work isn't for everyone. Find out about alternative careers available to biologists and how to transition out of research.

Jef Akst.

76

Reading Frames

An Honest Look at Biotech.

Working at a start-up biotech company was so intriguing that it begged to become the subject of a novel.

Jennifer Rohn.

Holiday Book Selections.

Bob Grant.

88

Foundations

The Philadelphia Chromosome, circa 1960.

Cristina Luiggi.
