

THE SCIENTIST

CONTENIDO

VOLUMEN 25 No. 1, JANUARY 2011

FEATURES

- 26 **Mining Bacterial Small Molecules.**
COVER STORY
As much as rainforests or deep-sea vents, the human gut holds rich stores of microbial chemicals L. CAETANO M. ANTUNES, JULIAN E. DAVIES AND B. BRETT FINLAY think these molecules should be mined for their pharmacological potential.
- 32 **The Coming Health.**
Indirect effects of global climate change threaten the health of hundreds of millions of people. The very uncertainty that shrouds this issue must serve as an organizing principle for adaptation to its ill effects.
Samuel S. Myers and Aaron Bernstein.
- 38 **From Simple to Complex.**
The switch from single-celled organisms to ones made up of many cells has evolved independently more than two dozen times, What can this transition teach us about the origin of complex organisms such as animals and plants?
Jef Akst.

DEPARTMENTS

- 11 **Editorial**
Brave New Drugs.
Intoxicating ideas for saving a billion lives.
Sarah Greene .
- 16 **Notebook**
Master Collaborator; Eau de Choice; A Morbid Map; One on one: Bacterial Glue; Top 7 from F1000.
- 23 **Thought Experiment.**
Synthetic Spirits.
Can we use science to reduce the harms of alcohol?
David Nutt.
- 24 **Critic at Large.**
Garage Innovation.
The potential costs of regulating synthetic biology must be counted against putative benefits.
Rob Carlson.

- 44 **Profile**
 Watt fun!
 Her doctoral advisor told her to amuse herself, and Fiona Watt has done just that — probing individual stem cells and determining the genes and molecules that direct them to differentiate or cause them to contribute to cancer.
 Karen Hopkin.
- 47 **The Literature**
 MicroRNAs and the development of leukemia; refining the role of basophils; human-induced changes to the terrestrial biosphere; a piece of Myc plays a role in differentiation and cytoskeletal organization; Scientist to Watch:
 Jeremy Reiter.
- 51 **Lab Tools**
 Probing Proteins.
 Cracking the secrets of post-translational modifications.
 Amy Maxmen.
- 54 **Bio Business**
 The Profits of Nonprofit.
 The surprising results when drug development and altruism collide.
 Megan Scudellari.
- 58 **Careers**
 Labcations.
 Getting to know your colleagues out-side the lab makes for better science.
 Vanessa Schipani.
- 64 **Reading Frames.**
 Appealing Choice.
 A book is born from pondering why sexual selection was, for so long, a minor component of evolutionary biology.
 Erika Lorraine Milan.
 Capsule Reviews.
 Richard P. Grant.
- 68 **Foundations.**
 The Mindless Machine, circa 1664.
 Vanessa Schipani.

IN EVERY ISSUE

- 9 **Contributors**
- 12 **Mail**
- 14 **Eavesdroppings**
