

THE SCIENTIST

CONTENIDO

VOLUMEN 25 No. 7, JULY 2011

FEATURES

- 30 **The Birth of Optogenetics.**
An Account of the path to realizing tools for controlling brain circuits with light.
Edward S. Boyden.
- 36 **Exosome Explosion!**
These small membrane vesicles do much more than clean up a cell's trash — they also carry signals to distant parts of the body, where they can impact multiple dimensions of cellular life
Clotilde Théry.
- 41 **Best Places to Work in Academia 2011.**
Whether it's attending a Scottish dance party or asking physics buffs to custom build your tools, researchers at this year's top institutions are getting creative at work.
The Scientist Staff.

DEPARTMENTS

- 12 **Editorial**
New New Things.
Why we love our jobs — there's never a dull moment.
Mary Beth Aberlin.
- 16 **Notebook**
Scientist to Watch; Trading Pelts for Pestilence; C-ing with the Lights Out; One on One; Eleanor Simpson.
- 24 **Thought Experiment.**
The Scientist Amanuensis.
A virtual lab — where all sorts of parameters are monitored and recorded — promises researchers a higher degree of reproducibility.
Peter Murray-Rust and Brian Brooks.
- 26 **Critic at Large.**
Desperately Seeking Radioisotopes.
New Strategies are needed to address the current and future shortages of radioisotopes that threaten medical research and treatment.
Robert E. Schenter.

- 28 **Modus Operandi.**
Smashing Crystals.
A powerful new X-ray-generating laser is imaging smaller crystals than ever before.
Richard P. Grant.
- 48 **The Literature.**
Centriole architecture; gut-protective bifidobacteria: Lamprey thymus.
- 50 **Profile.**
Foresight.
Studying the earliest events in visual development, Carla Shatz has learned the importance of looking at one's data with open eyes — and an open mind.
Karen Hopkin.
- 53 **Scientist to Watch.**
Harmit Malik.
Megan Scudellari.
- 54 **Lab Tools.**
How Green Is My Lab?
Doing science sustainably.
Jeffrey M. Perkel.
- 57 **Careers.**
Balancing Biases.
How cognitive prejudices can influence research decisions and how the pitfalls of human nature can be avoided.
Jef Akst.
- 66 **Reading Frames.**
A Scar Nobly Got.
The Story of the US government's efforts to stamp out smallpox in the early 20th century offers insights into the science and practice of mass vaccination.
Michael Willrich.
- Capsule Reviews.**
Richard P. Grant.
- 68 **Foundations.**
The First X- ray, 1895.
Hannah Waters.
- IN EVERY ISSUE**
- 11 **Contributors.**
- 14 **Speaking of Science.**

60 **The Guide.**

62 **Recruitment.**
