

# ***THE SCIENTIST***

## **CONTENIDO**

**VOLUMEN 27 No. 6, JUNE 2013**

### **FEATURES**

- 30 **Factoring in Face Time.**  
How the study of human social interactions is helping researchers understand the spread of diseases like influenza and HIV.  
*Adam Kucharski.*
- 36 **It Takes a Village.**  
Scientists working in developing countries find that giving back to local communities enriches their own research.  
*Beth Marie Mole.*
- 42 **Best Places to Work in Industry, 2013.**  
Our final survey of the life-science industry workplace highlights the companies — small and large, domestic and international — that are making their researchers feel valued and at home.  
*The Scientist Staff.*

### **DEPARTMENTS**

- 13 **From the Editorial**  
**The Next Big One.**  
As new infections surface and spread, science meets the challenges with ingenuity and adaptation.  
*Mary Beth Aberlin.*
- 15 **Notebook**  
**Evolution Takes a Road Trip; Oral History; Mobile Microscopes; Croakus Interruptus.**
- 24 **Critic at Large.**  
**Misconduct Around the Globe.**  
Research misconduct is not limited to the developed world, but few countries anywhere are responding adequately.  
*Richard Smith and Tracey Koehlmoos.*
- 26 **Critic at Large.**  
**Defending Against Plagiarism.**  
Publishers need to be proactive about detecting and deterring copied text.  
*Jonathan Bailey.*

- 28      **Modus Operandi.**  
**Dead or Alive?**  
Scientists create nontoxic pH nanosensors to assess viability of transplanted therapeutic cells.  
*Ruth Williams.*
- 46      **The Literature.**  
**Mapping loss of potential in neuronal stem cells; novel protein folding forms a membrane pore; saving rare avian scavengers.**
- 48      **Profile.**  
**In Evolution's Garden.**  
Raising one evolutionary question after another, Brandon Gaut has harvested a crop of novel findings about how plant genomes evolve.  
*Megan Scudellari.*
- 51      **Scientist to Watch.**  
**Mary O'Connor.**  
*Kerry Grens.*
- 52      **Lab Tools.**  
**Resolving Separation Anxiety.**  
Continuing innovations in liquid chromatography column technology are improving the speed and separation efficiency of HPLC.  
*Nichollette Zeliadt.*
- 56      **Lab Tools.**  
**Piece by Piece.**  
Fragment-based drug discovery.  
*Sarah Webb.*
- 59      **TS Webinar Series Summary.**  
**Decoding DNA: New Twists and Turns.**  
“What’s Next in Next-Generation Sequencing?” / “Unraveling the Secrets of the Epigenome”/ “The Impact of Personalized Medicine”.  
*Kerry Grens.*
- 69      **Reading Frames.**  
**Calling All Thinkers.**  
Encouraging different thought processes, even those typically classified as “abnormal”, can be a great boon to the research enterprise.  
*Temple Grandin.*
- Capsule Reviews.**  
*Annie Gottlieb and Bob Grant.*
- 80      **Foundations.**  
**The Elixir Tragedy, 1937.**  
*Jef Akst.*
