

SCIENTRIFFIC

CONTENIDO

No. 76, NOVEMBER-DECEMBER 2011

FEACTURES

- 5 A small planet the size of Mars probably smashed into our planet about 4.5 billion years ago.
- 8 Termites are more closely related to cockroaches than ants.
- 10 Astronomers are paying attention to about 8000 objects in space that could one day come close to our planet.
- 12 After female cassowaries lay their eggs, the father guards the nest and then raises the chicks.
- 14 Musk turtles can breathe underwater by absorbing oxygen through their tongue.
- 22 Like identical twins, all bananas have the same sets of genes.

Hands-on activities

- 24 When Life you Lemons.
- 26 Run a Lemonades Stand!
- 28 Solar Ice Cubes.

COVER IMAGE

Dive into a story about life beneath the water's surface [pages-17] and discover how different aquatic animals get their oxygen. Meet a most unusual-looking feathered fellow [page12] and pick apart a salad to learn about plant parts [pages 22-23].
