

AUSTRALASIAN SCIENCE

CONTENIDO

VOLUMEN 31 No. 4, MAY, 2010

FEATURES

- 14 **Inside the Minds of the Trendsetters.**
Brain scans have revealed which personality types are the most influential in the widespread adoption of new trends and technologies.
John Gountas and Joseph Ciordiari.
- 18 **A Matter of Time.**
Successful treatment of cancer may depend on the accurate timing of chemotherapy or vaccine therapies to match fluctuations in each patient's immune system.
Martin Ashdown and Brendon Coventry.
- 21 **A Mystery of Astronomical Proportions.**
At least one-third of all red giant stars have a mysterious variation in brightness that has astronomers stumped.
Christine Nicholls.
- 24 **Neutrino Hint from Radioactivity Puzzle.**
The discovery that the decay rates of radioactive isotopes may not be immutable "constants of nature" could open fresh ways of detecting neutrinos and protecting astronauts and satellites in space.
Matthew Goddard.
- 27 **Rise of the Machines.**
The cells in our body work because of the many "molecular machines" within them — but where machines comes from?
Trevor Lighgow.
- 30 **Sea Slugs Turn up Heat on Bleaching.**
Symbiotic sea slugs employ similar zooxanthellae species as corals, offering fresh insights into why heat-stressed corals bleach.
Ingo Burghardt.
- 33 **Can Mimicking Nature Quench Our Thirst?**
Patterned polymer surfaces based on the African *Stenocara* beetle could be applied to our roofs to collect drinking water from the atmosphere.
Stuart Thickett, Chiara Neto and Andrew Harris.

- 36 **NASA's Uncharted Future.**
What does the scrapping of NASA's.
Morris Jones.

conSCIENCE

- 38 **Deadly Concerns Over Herbal Medicines.**
Just how safe are herbal medicines, and how well are we evaluating their possible contribution to illness and death?
Roger W. Byard.

REGULAR COLUMNS

- 3 **Simon Says**
Politicians have given in to public fears about the safety of beef imports rather than doing "what he science tells us".
- 4 **Browse**
A round-up of the latest science news from our shores.
- 39 **Cool Careers**
The bacteria in decomposing bodies can help to determine when a person died – even if only a skeleton remains.
- 40 **reminiSCIENCE.**
Michael Archer's life-long attachment to animals as research subjects and personal pets matches his passion for the records they have left in the unique fossil beds of the Australian outback.
- 42 **Out of this World.**
Dave Reneke brings news from the space and astronomy communities around the world.
- 43 **Australasian Sky.**
Your map of the night sky this month.
- 44 **The Naked Skeptic**
The anti-vaccination lobby has been dealt some crucial blows in the US courts.
- 45 **Publish or Perish.**
Your guide to new science books published this month.
- 46 **Eco Logic**
We have a lot to learn from Swedish conservation efforts.

47

Low Tech.

Innovation in New Zealand is following Australia's lead along a road to nowhere.

48

Quandary.

Exhibits of "plastinated" human remains in garish poses raise issues of human dignity.
