

AUSTRALASIAN SCIENCE

CONTENIDO

VOLUMEN 31 No. 5, JUNE, 2010

FEATURES

- 14 **Meeting the Missing Link.**
Paul Dirks gives a first-hand account of the expedition that found a new species of hominid linking humans and apes.
John Gountas and Joseph Ciordiari.
- 18 **Entropy Theories in State of Disorder.**
Australian researchers have found that there is more disorder in the universe than previously realized – and that one of Stephen Hawking’s assumptions is probably wrong.
Stephen Luntz.
- 21 **How Australia Dried Out.**
Lake Bungunna, a megalake that existed 1-2 million years ago in today’s Murray-Darling Basin, reveals the story and timing of the onset of arid climatic conditions in south-eastern Australia.
Christine Nicholls.
- 24 **The First Breath.**
A new fossil find shows that a global decline in oxygen millions of years ago drove the evolution of air-breathing in lungfishes.
Alice Clement.
- 26 **Reef Emissions Affect Climate.**
Coral reefs produce a natural aerosol that creates clouds over the ocean and keeps sea surface temperatures stable – with implications for both reefs and rainforests.
Graham Jones & Zoran Ristovski.
- 29 **In Space No One Can Hear You Sneeze.**
The altered gravity conditions of space can have serious detrimental effects on the health of astronauts. Understanding the cellular basis of this phenomenon could lead to better medical treatments on Earth.
Elizabeth Blaber, Helder Marcal, John Foster & Brendan Burns.
- 32 **Freaks of the Sea.**
Once the stuff of maritime legend, rogue waves up to 30 metres high have

been detected by satellites, posing a significant threat to shipping and oil rigs. Now computational scientists are smashing virtual rogue waves into virtual oil and gas platforms to help design stronger, safer structures.

Murray Rudman.

35 **Fresh Water Using Geothermal Heat.**

Geothermal heat can provide cheap fresh water to homesteads and small townships in the outback by removing salt from brackish aquifers.

Hal Gurgenci.

conSCIENCE

38 **Homeopathy Costs Us All.**

There is no evidence that homeopathy is more effective than a placebo yet medical insurance companies – subsidised by the government – are extending their cover due to client demand, and health authorities lack the power to act on misleading claims.

REGULAR COLUMNS

3 **Simon Says**

NASA's plans to revisit the Moon may have been shelved but US President Barack Obama has announced more ambitious long-term plans for space exploration.

4 **Browse**

A round-up of the latest science news from our shores.

39 **The Naked Skeptic.**

It is quite to build false memories, even ones as serious as sexual abuse.

40 **reminiSCIENCE.**

Ian Lowe is proof of the value of scientists who apply their scientific training and experience to issues at the interfaces of science, technology, society and policy.

42 **Out of this World.**

Dave Reneke brings news from the space and astronomy communities around the world.

43 **Australasian Sky.**

Your map of the night sky this month.

44 **Cool Careers**

How can slime moulds make complex decisions when they don't have a

brain?

46

Eco Logic

Approaches to conservation may differ around the world but the challenges are similar.

47

Low Tech.

Will new technology make nuclear energy viable?

48

Quandary.

When the DNA profiles of innocent people are kept by law enforcement agencies they are at risk of a lifetime of genetic surveillance.
