

AUSTRALASIAN SCIENCE

CONTENIDO

VOLUMEN 32 No. 1, JANUARY, 2011

FEATURES

- 14 **Big Bang Conundrum.**
An unexpected consistency in the concentration of deuterium atoms in the distant universe might be a curious coincidence, or it could rewrite our understanding of the Big Bang.
Stephen Luntz.
- 16 **How to Make a Megastar.**
Astronomers are still largely in the dark when it comes to understanding how the most massive stars form, but they are now pursuing several new strategies to solve this enduring mystery.
Peter Barnes.
- 20 **Cosmic Time Machine.**
Precise dating of impacts on the Moon might contribute to a better understanding of life on Earth.
Marc Norman and Tim Wetherell.
- 23 **The Truth About Impact Craters.**
The Earth is scarred from meteor impacts, but how old are they and do these ages match the dates of mass extinction events?
Fred Jourdan.
- 27 **Fool's Gold: The Search for Early Life.**
The golden mineral pyrite, is a valuable tool in the search for the secrets of early life on Earth.
Michaela Partridge.
- 30 **The Rise of the Crocodile Hunters.**
Recent excavations in Kenya have revealed the first evidence that a diet of fish and crocodiles two million years ago may have aided the development of larger brains in the human lineage.
Andy Herries.
- 34 **Is Intelligence Out There?**
Intelligence may not be the ultimate outcome of evolution on Earth, so why should we expect human-like intelligence elsewhere in the cosmos?

Stephen Luntz.

- 38 **The Fish Cleaners.**
Not all cleaner fish are trustworthy, so why don't more of them get eaten?
Stephen Luntz.

conSCIENCE

- 40 **The X-Factor in the Productivity Equation.**
The progress of women in science and technology has stalled for the past 15 years.
Anna-María Arabia.

REGULAR COLUMNS

- 3 **Simon Says**
To patent or not to patent? That is the question.
- 4 **Browse**
A round-up of the latest science news from our shores.
- 41 **Publish or Perish.**
Your guide to new science books publishes this month.
- 42 **Australasian Sky.**
Your map of the night sky this month.
- 43 **Out of this World.**
Dave Reneke brings news from the space and astronomy communities around the world.
- 44 **Cool Careers.**
Malcolm Wallace has made many contributions to geology, but his discovery of the Arkaroola Reef may overshadow them all.
- 45 **The Naked Skeptic.**
Association with a prestigious organization can bestow credibility upon those who don't deserve it.
- 46 **Eco Logic.**
Science has long demonstrated that marine reserves protect marine biodiversity. Rather than answer the same question again, isn't it about time we started funding research that answers some useful scientific questions?
- 47 **Lowe Tech.**
A high-fibre barley variety developed by CSIRO is proving a winner with

consumers of breakfast cereals.

48

Quandary.

An analysis of significant medical research papers has concluded that “most research findings are false for most research designs and for most fields”.
