

# ***AUSTRALASIAN SCIENCE***

## **CONTENIDO**

**VOLUMEN 32 No. 2, MARCH, 2011**

### **FEATURES**

- 14      **Resurrecting a Wonder Drug.**  
As the malaria parasite pits its all against the only treatment still standing, award-winning research has revealed the secret to reviving the most successful antimalarial drug in history.  
*Tegan Dolstra.*
- 17      **In Deep Guano.**  
Deep deposits of guano are revealing why South-East Asia is a biodiversity hotspot.  
*Peter Barnes.*
- 21      **Tiny Climate Changers.**  
Marine microorganisms have profound impacts on the chemical cycling processes that influence global climate. Now their behaviours and preferences have been captured on video.  
*Justin Seymour.*
- 24      **Ancient Genes Reveal our Precambrian Ancestor.**  
The genome of a sponge found on the Great Barrier Reef is helping scientists to reconstruct the 600 million-year-old ancestor of the entire animal kingdom.  
*Claire Larroux.*
- 28      **Forest Phoenix.**  
How well have animals and plants recovered after Victoria's Black Saturday bushfires 2 years ago?  
*David Lindenmayer, David Blair, Lachlan McBurney and Sam Banks.*
- 30      **A Bonsai Black Hole in Our Own Backyard.**  
The discovery of powerful jets from a nearby black hole reveals new clues about the behavior of massive quasars in the early universe.  
*Robert Soria.*
- 33      **An Apple a Day Keeps the Drought Away.**  
Think twice the next time you see fruit trees portrayed in media reports about diminishing water allocations in the Murray-Darling Basin.

*Geoff Russell.*

36

**Nuclear Spring?**

New research shows that the Australian public may accept nuclear energy if it will help tackle climate change.

*Deanne K. Bird, Katherine Haynes, Rob van den Honert and John McAneney.*

**conSCIENCE**

39

**The Case for Gene Patents.**

Patents are an essential incentive for investment in research.

*Michael Gilbert.*

**REGULAR COLUMNS**

3

**Simon Says**

Can the government's Inspire Australia strategy raise public appreciation of science?

4

**Browse**

A round-up of the latest science news from our shores.

40

**Expert Opinion.**

Australian researchers comment on US research that successfully produced mice whose DNA was derived from two fathers.

41

**Publish or Perish.**

Your guide to new science books publishes this month.

42

**Australasian Sky.**

Your map of the night sky this month.

43

**Out of this World.**

Dave Reneke brings news from the space and astronomy communities around the world.

44

**Cool Careers.**

Reality TV shows and YouTube videos are providing insights into lying and arguing.

45

**The Naked Skeptic.**

The truth comes out about research linking vaccination with autism.

46

**Eco Logic.**

A new analysis has found that our National Reserve System is not much

better than a completely random placement of reserves when it comes to protecting our endangered species.

47

**Lowe Tech.**

United Nations talks in Mexico lacked the “hot air” required for meaningful government action on climate change.

48

**Quandary.**

WikiLeaks has exposed US government directives for the collection of biometric information on foreign diplomats.
