

AUSTRALASIAN SCIENCE

CONTENIDO

VOLUMEN 32 No. 6, JULY/AUGUST, 2011

FEATURES

- 14 **The Mouse Is Not Enough.**
Fundamental differences in embryonic development mean that research using mice may not be reliably applied to other mammals, and that cattle embryos may be a better model for cell studies in humans.
Peter Pfeffer & Debra Berg.
- 17 **Rig Recycling.**
Some 6500 oil rigs are due for decommissioning by 2025 at a cost of 100 billion. Would they be more useful as artificial reefs?
Ashley Fowler, Peter Macreadie & David Booth.
- 20 **Droughts? Floods? Or Will We Run Out of Fuel First?**
Does the impending arrival of “peak carbon” mean that alarming climate change scenarios need to be revised downwards?
James Ward & Simon Beecham.
- 22 **Gender Barriers in Science.**
Australia is losing a huge proportion of potential scientists as women drop out of science at a disturbingly high rate.
Stephen Luntz.
- 24 **First Ladies of Science.**
Australasian Science profiles 12 women who have made outstanding contributions to science and technology in Australia. What are the secrets to their success, and what barriers did they have to overcome?
Bill Mackey.
- 32 **Baby Blues.**
A mother’s immune response to influenza and other infections during pregnancy increases the risk of schizophrenia in her unborn child.
Desiree Dickerson.
- 35 **Chiro for Kids?**
Why is a university running a paediatric chiropractic clinic that targets the vulnerable parents of sick children?
Loretta Marron.

- 37 **The Big Twist.**
Fossil magnetic needles in ancient Australian rocks have revealed that the continent underwent 40° twist that split apart its most famous mineral provinces.
Zheng-Xiang Li.

conSCIENCE

- 4 **Death in the Hive.**
Almost 5 years since colony collapse was identified, the science tells us there is neither a single cause nor a single solution.
Andrew Barron.

REGULAR COLUMNS

- 3 **Simon Says**
Australia's new Chief Scientist could be as good as the first.

- 5 **Browse**
A round-up of the latest science news from our shores.

- 39 **Cool Careers.**
Krystal Evans took time from her own research to help save funding for medical science.

- 40 **Chemical Solutions.**
Women have come a long way in chemistry since Marie Curie won her Nobel Prize 100 years ago.

- 41 **Directions.**
The possibility that political wrangling could lead to the closure of the Australian Synchrotron is almost beyond comprehension.

- 42 **Australasian Sky.**
Your map of the night sky this month.

- 43 **Out of this World.**
Dave Reneke brings news from the space and astronomy communities around the world.

- 44 **The Naked Skeptic.**
What are the dangers, if any, from radiation emitted by mobile phones, microwaves, power lines, WiFi and Bluetooth.

- 45 **Eureka!**

Our visual system is hard-wired to pay attention to people we've heard bad things about.

46

Eco Logic.

A new analysis suggests that recovery plans for threatened species need to be significantly improved if they are to make a difference.

47

Low Tech.

Logging is continuing in Tasmanian forests of high conservation value months after an agreed deadline to cease logging has passed.

48

Quandary.

Induced pluripotent stem cells are not the ethical breakthrough they were initially thought to be.
